WELCOME

After the challenges of the previous season, 2025/26 provided a welcome change at Fairview. We had an early break and rain continued through the season, bringing us back to more typical – and at times very soggy – winter conditions, albeit with relatively mild temperatures.

The favourable season was reflected in our lambing results, with a marking percentage of 111% to ewes joined, or 120% to ewes lambed. This is our highest result since benchmarking began in 2020 and a pleasing reflection of both the season and the ongoing focus on flock performance.

It wasn't all plain sailing, however. Predation from a number of particularly elusive foxes proved to be the biggest challenge during lambing. After some persistence, and with the help of an infrared scope, Greg finally got the upper hand!

Our 2025-drop rams have benefited from the favourable conditions throughout the year. With good pasture growth, only minimal supplementary feeding was required through summer and autumn, allowing the rams to develop naturally in a strong season.

As with each year, we believe this draft is better than the last. This reflects our ongoing commitment to improving the Fairview flock and breeding Polwarths that combine the qualities we believe are important for a productive and profitable sheep enterprise – sound structure, wool quality, doing ability, fertility and a range of health traits. We are pleased with the consistency and overall quality of this year's team and look forward to seeing how they perform for their new owners.

On behalf of Greg, Kaye and Sam, we warmly welcome you to our 2026 Ram Sale. We sincerely appreciate the ongoing support and interest in our breeding program and wish all our clients a successful and rewarding year ahead.

Greg, Kaye & Sam

OUR FOCUS

Our breeding program continues to focus on producing well-balanced, productive Polwarths that are suited to our environment and able to perform in a commercial sheep enterprise. We are aiming to balance the traits that contribute to profitability and longevity — fertility, growth, carcase performance, wool, health and structural soundness — rather than selecting strongly for any one trait in isolation.

A significant development in our breeding program has been the continued adoption of Australian Sheep Breeding Values (ASBVs). All of our animals now have ASBVs available, and we are on a steep learning journey as we incorporate this information into our classing and selection processes. We have enlisted the support of Georgia Buchholz from NextGen Agri to assist with data management and provide guidance on interpreting and using ASBVs effectively.

PERFORMANCE RECORDING

To work towards our objectives efficiently, animals are individually recorded on Sapien Technology Kool Collect software where the following information is recorded:

- Electronic identification
- Pedigree
- Health treatments
- Weight gain
- Wool & Carcase Measurements
- Breeding Performance

It has been an interesting process, and we are finding some really exciting data within our flock. While we are still learning, ASBVs are providing another valuable tool to help us identify animals that can contribute to the continued improvement of the Fairview flock.

Our key areas of selection remain:

Fertility – stud ewes are joined to Polwarth rams for one cycle only, ensuring replacement ewes come from early-cycling dams. Ewes are pregnancy scanned to determine their status, with fertility remaining a key driver of selection.

Carcase – we continue to place emphasis on fat and eye muscle depth. These traits contribute to lamb survival, maternal ability and resilience under challenging seasonal conditions, while also supporting the production of a valuable carcass. We are using ASBVs alongside visual assessment to help balance these traits within the flock.

Fleece – our target is to maintain flock micron at approximately 21–22 micron while increasing the contribution of fleece weight to overall selection. We are particularly interested in improving staple length and fleece production without simply increasing skin wrinkle. Our focus remains on white, well-nourished wool with good staple structure and commercial value.

Health – healthy sheep that require less intervention are an important part of a productive and sustainable flock. We are increasingly incorporating health traits into our selection decisions, including worm egg count (WEC) and dag score. While breech wrinkle is not a significant issue within our flock, we continue to monitor and select for overall body and breech characteristics that support sheep health and longevity.

Feet – we continue to select for sound hoof structure and feet that can withstand the persistent wet conditions at Fairview. Sound feet are essential for longevity and the ability of sheep to remain productive in our environment.

Maternal Traits – strong mothering and milking ability remain fundamental to lamb survival and growth. To monitor these traits:

- Lambs are tagged at birth, with the number of lambs born and reared recorded.
- Ewes are given a mothering score from 1–5, from very good to very poor. Only ewes scoring 1, 2 or 3 are retained in the stud.
- Ewes are checked for wet/dry status and udder health at marking.
- Lambs are weighed at weaning.

Ultimately, our aim is to continue making steady, balanced improvements across the flock. ASBVs are giving us another layer of information to support our visual assessment and performance records, helping us make more informed decisions about which animals will contribute to the next generation of Fairview Polwarths.

AuctionsPlus

How to Register and Bid on AuctionsPlus

1

Go to www.auctionsplus.com.au to register at least 48 hours before the sale.

2

Select **"Sign Up"** in the top right hand corner.

3

Fill out your name, mobile number, email address and create a password.

4

Go to your emails and confirm the account.

5

Return to AuctionsPlus and log in.

6

Select **"Dashboard"** and then select **"Request Approval to Buy"**.

7

Fill in buyer details and once completed go back to Dashboard.

8

Complete buyer induction module (approx. 30 minutes).

9

AuctionsPlus will email you to let you know that your account has been approved.

10

Log in on sale day and connect to auction.

11

Bid using the two-step process – unlock the bid button and bid at that price.

12

If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Phone: (02) 9262 4222

Email: info@auctionsplus.com.au

COMMERCIAL RAMS

We are pleased to present a group of commercial rams at this year's sale.

The focus of this joining was to improve carcase and growth traits in our commercial flock. This group was lambled as a single mob, with no individual sires and dams recorded.

They are born in June 2025 and shorn on 20 April 2026, with exception of 250213 shorn 1 August 2026.
